Sea fishing weight

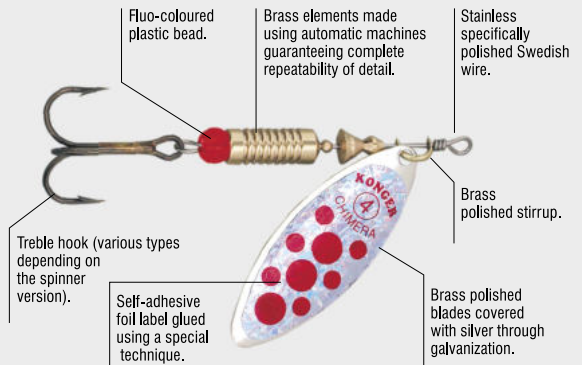

Thanks to its shape, the weight allows making casts at distances exceeding 100 m, and through the use of the fixed metal "moustache" it digs into the bottom and is not carried off by the tides. While winding the kit, just pull and the moustache turns around and does not catch the bottom. It is also a perfect solution for ground fishing in rivers with high-speed current, since it is easy to anchor a kit in an enticed place.

KASTMASTER is a very effective, easy-to-use lure. Its aerodynamic shape allows making distant casts and serving the lure without scaring away careful predators. The lure operation is really aggressive and provocative, thanks to which all species of predatory fish are easily lured. Wear resistance is Kastmaster's great advantage. They are precisely cut from solid brass, thus are almost indestructible and highly resistant to both fresh and salt water. Kastmaster is particularly effective for catching asp.

Development of this lure took us almost a year, but now we can proudly say: it was worth to wait. Power Pike is a lure which triggers the killing instinct in any pike, anytime, in any water. Slim and elongated body with well angled paddle tail together with balanced elasticity of the plastic give Power Pike incredibly catchy action, regardless of the weight of the head and speed of retrieving. If you'll leave it to fall freely, it will mimic a fish trying to dive for safety, that often is a key to succeed.

To get the best of it, use rather low weight – 5 or 10 g makes the action just as it should be, both for slower retrieving at ~1,5 m, or a little faster, around some cover where the fish are waiting for their prey. Available chart of colors and sizes makes the choice quite easy – Power Pike is one of the best and most versatile pike lure on the market.

Large soft lures are now used more and more often by many people who are trying to catch those biggest of pikes. This lure is available in 3 different sizes, to match fish preferences on different kinds of water. Starting from the first day of field tests, this lure gave us shivers - as we've seen, not only to us. Quite a solid number of predatory fishes hit these lures with great ferocity. Smallest one is best choice for perch, mid one makes zanders crazy, and the big brother provokes the pikes to attack even from distance. Two smaller sizes can be rigged with jig head only, but for the big one, you should definitely use a single or double stinger rig. You can expect that Flat Shad will make you smiling pretty often. Basically, there is not a single species of predatory fishes that can resist its provoking, belly-flashing action. This lure is a 'must have' for every angler who wants to catch more fishes, more often.

Recommended by Daniel Kowalski TEAM KONGER

The lure size, operation and colours have been tested in numerous fishing grounds. The smallest sizes superbly lures perches, whereas the bigger ones are literally "killers" of pikes and pike perches. The lure works well both on light and heavy jigheads. The Grubber's body is notched for fitting by an offset hook.

A lure with a very wide range of possible use. The 5-centimetre version is an effective lure for perch, the 7,5-centimetre model lets you catch zanders, and the 12-centimetre Blinky is the right choice for every pike fishing enthusiast. What is even more interesting, the scent used on our baits provoked attacks of decent-sized catfish. That is why we recommend rigging the biggest Blinky Shad with a heavy jig head and to give it a try in the river holes and bends.

■ 1 PCS

New style of the lure, being a hybrid of swimbait and spinning blade. Twist Tail allows angler to fish in new, creative ways. Of course, you can use it same way as classic blade or crankbait – it will catch the fish. Yet, to release its full potential you should to let it drop as deep as you want, and twitch it, or jerk it once every few handle turns. It's a great lure for pike, zander or large size perch. You can choose from several selected colors to make your fishing more efficient. Both is rivers and lakes, this lure works like a charm. Top quality hook and treble will keep the fish firmly until it will land in your hands.

Perch above 40 cm is a really good catch. Anybody who can catch those on purpose is some sort of fishing professor. To give an upperhand to anyone trying to reach this level of fishing, we have prepared this lure. Seems familiar, but same time, different... Ribs on the body creates specific water turbulences – believe us, perch love it. Short, curly tail wiggles in most provoking way, irresistible for the fish. Worth to mention, is this lure scent – believe us it's impossible to forget. Add to this list carefully selected color chart, and 2 typical perch sizes. Well, it's the shortest recipe for fishing success.

Exceptionally catching rippers operating during the slowest jiggling. The chief assets of this soft bait series include the most useful sizes, colours and a particularly alluring dyed tail. Carefully selected materials and shapes have caused an impeccable regard even among the most demanding spin fishermen. Depending on the size, we recommend them for perches, zanders, pikes and catfish.

What should be a trademark of a perfect softbait? First of all it has to ensure bites. Moreover, it must have a high stretch resistance and a broad spectrum of available colours and sizes. All those features are combined in this new Grubber Shad Skinny. The five-centimetre version is an unbeatable perch lure, that lets you catch even the most cautious specimens. The 7,5-centimetre model effectively lures big perch and zanders in all Polish fishing grounds.

Four different sizes, a wide spectrum of colours and simply excellent tail action at the slightest lure movement will allow hunting for virtually any predator living in our waters. The 6-centimetre Big Tail has appeared to be the favourite perch dish, whereas the largest 14-centimetre model was viciously attacked by pikes and catfish. Two intermediate sizes are perfect for luring zanders.

This slim ripper is excellent for catching all predators. You can choose from the 7.5 cm, 10 cm, 12.5 and 14 cm models. The small sizes perfectly lure perch and asp, whereas the larger ones enable efficient luring of non-feeding pikes or zander. Slim Shad body is notched for fitting both a classic head and an offset hook.

Power Grub

In connection with a hoof-shaped tail, the twister body superbly provokes fish biting in both fresh-water and sea. It does not matter if you use it with a jig head, offset hook or as a side lure for cod – you will like it at first contact. Power Grub is made of a very soft material while at the same time is resistant to tear.

Provocative and speedy. This split-tail bait can be combine with various fishing methods and will perform great in both fresh- and salt-waters. Especially effective in the vertical method with a football jighead. The soft silicon material makes the bait move lively even during gentle animation. Vertical Shad will provoke even the most lazy pike or zander.

Very effective bait made from soft silicone. The characteristic elastic tail makes Vertical Minnow equally powerful in luring predator fish in the classical spinning techniques as well as during the free-fall to the bottom. The bigger size is simply perfect for hunting big zander, pike or a descent- sized perch. The bait can be rigged up with a classic jighead, a football jighead or with an offset hook – in any of these combinations Vertical Minnow stays constantly effective.

DropShot Lures

3300501 V-KING SHAD

■ size: 5 cm

Lure article number structure

3300501 **xx**

Colours

This lure will do invaluable favours during perch and pike hunting. It is willingly attacked by zander and also works perfectly with a jig head.

3300901 MAGGOT

■ size: 5 cm

Lure article number structure

3300901 **xx**

Colours

Maggot imitates the shape of popular insect larvae. The body tapering towards the back predisposes the lure for drop shot and side strap methods. Ribs along the lure's entire length significantly increase its appeal.

3300701 SLIMEY GRUB

■ size: 5 cm

Lure article number structure

3300701 **xx**

Colours

This lure is dedicated to fishing with a drop shot and a side strap. The ribbing of the body reliably works on the side line of predators. Characteristic for this lure is its flat tail, ended with a ball, that attracts the fish even with the slightest movement.

3300801 MICRO FISH

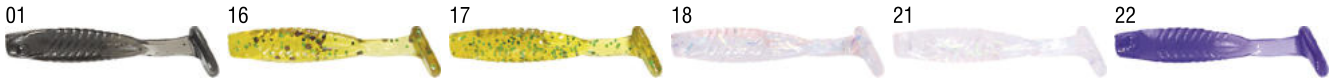

Lure article number structure

3300801 **xx**
Colour

■ size: 3 cm

As the name itself indicates, Micro Fish is an imitation of a fry. In combination with an extended ripper tail, the body allows for very slow while at the same time attractive lure retrieval.

Helicopter Rig with tube 1 set
Art. no 966 000 038

no 1 Bolt Rig
bag: 2 PCS Art. no 960 000 110

A classical self-hooking tool. Its structure is based on a safe clip with an anti-tangle tube for direct assembly to the main monofilament.

no 5 Feeder Rig
bag: 3 PCS
Art. no 960 000 114

An anti-tangle kit. A clip for weight assembly and an anti-tangle tube form its integral parts. Often called a feeder kit.

Safety Rig Assembly Kit
bag: 2 PCS Art. no 966 000 011

Helicopter Rig Assembly Kit
bag: 2 PCS
Art. no 966 000 012

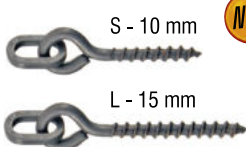

no 3 Helicopter Kit
bag: 2 PCS Art. no 960 000 112

A helicopter kit, most popular due to the possibility of use in almost any fishery.

SHORT SHANK

ART. NO	SIZE	PCS/PACK
765 102 902	2	6
765 102 904	4	6
765 102 906	6	6
765 102 908	8	6

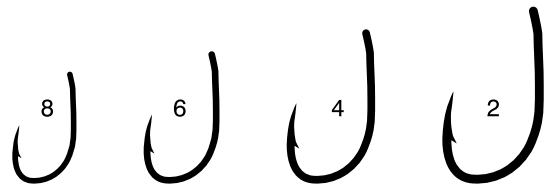

Short Shank. Extremely strong hook for extremely demanding fisheries with huge fish specimens. If we would have to compare Short Shank to something common, it would be a hammer. Utterly indestructible, working always the same, well known way. This hook is not afraid of gravel, neither forceful fight among the snags. If your fishing spot is technically demanding area, this hook will be your best friend.

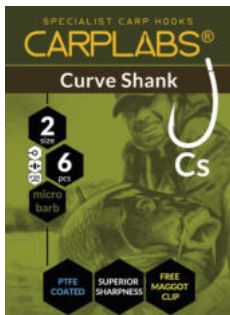

WIDE GAP

ART. NO	SIZE	PCS/PACK
765 103 902	2	6
765 103 904	4	6
765 103 906	6	6
765 103 908	8	6

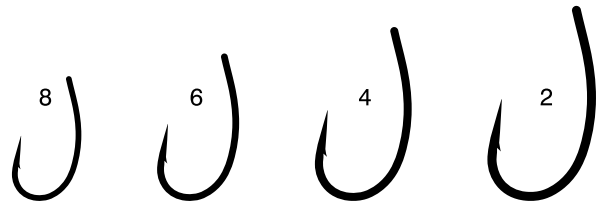

Wide Gap. This kind of hook is considered by all experienced specimen hunters as one of the best. Shape of the hook ensures effective self setting, and firmly hold the fish. Point bent towards hook's eye works well during fishing on sandy or gravel bottom, not losing anything of it's starting sharpness. Excellent choice for each method using boilies.

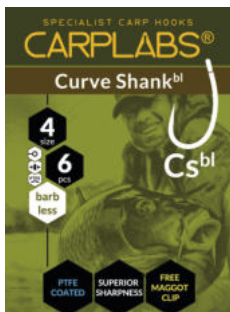

CURVE SHANK

ART. NO	SIZE	PCS/PACK
765 106 902	2	6
765 106 904	4	6
765 106 906	6	6
765 106 908	8	6

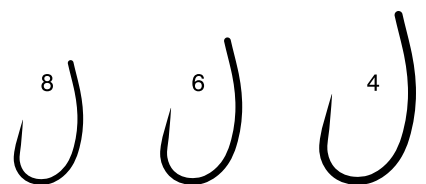

Curve Shank. Tested in all circumstances, from small ponds, through huge, wild lakes, up to the powerful rivers. Everywhere, every time when you want to maximize your catch, this friend will help you to do so. Aggressive angle between the point and the eye will be a warranty of successful setting the hook at each bite. Perfect to use with classic hair rigs and semi stiff rigs. Depending to the size, works well through full spectrum of baits.

CURVE SHANK BARBLESS

ART. NO	SIZE	PCS/PACK
765 116 904	4	6
765 116 906	6	6
765 116 908	8	6

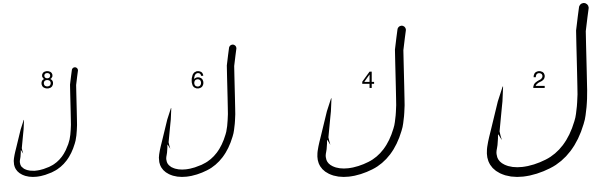

Curve Shank Barbless. Many fisheries doesn't allow to use barbed hooks. We know that it's better to be safe then sorry. If you want to be prepared for anything, always have a chart of different sizes of those hooks, some FC line and soft 25lbs braid. Enough said, one of the best hook which we have ever had a pleasure to fish with.

STIFF RIGGER

ART. NO	SIZE	PCS/PACK
765 105 902	2	6
765 105 904	4	6
765 105 906	6	6
765 105 908	8	6

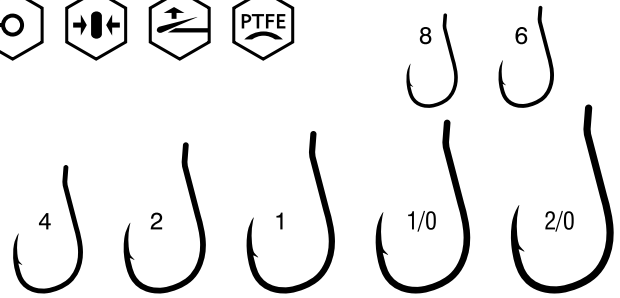

Stiff Rigger. Powerful hook working miracles with stiff rig and chod rig. Extremely sharp and catchy point makes the job done well, while PTFE coating helps to penetrate tissue with an ease. Forged profile of this hook ensures strength needed to fight enormous specimens of carp or grass carp, and micro-barb will hold the fish till successful landing.

SPECIMEN

ART. NO	SIZE	PCS/PACK
765 104 921	2/0	6
765 104 911	1/0	6
765 104 901	1	6
765 104 902	2	6
765 104 904	4	6
765 104 906	6	6
765 104 908	8	6

Specimen. Rediscovered classic. Extremely catchy model ensuring very good number of hooked fishes, forged for uncommon strength. Works well with many different baits, while the size chart allows to choose something from 3 corns on a hair, up to 30mm snowmen.

METHOD FEEDER

ART. NO	SIZE	PCS/PACK
765 101 910	10	6
765 101 912	12	6
765 101 914	14	6
765 101 916	16	6

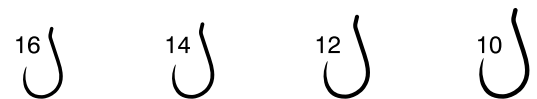

Method Feeder. Small, yet astonishingly strong hook dedicated to method feeder fishing. Eye bent backwards allows to use fluorocarbon, monofilament and braided line. Shape of the hook is designed to maximize the number of successful hook ups. Characteristic, wide gap firmly holds the catch ensuring bigger number of landed fishes.

METHOD FEEDER BARBLESS

ART. NO	SIZE	PCS/PACK
765 111 910	10	6
765 111 912	12	6
765 111 914	14	6
765 111 916	16	6

Method Feeder Barbless. Barbless version of Method Feeder hook, sharing all the advantages with the predecessor, excluding one: the barb. Comparing the number of caught fishes, there are almost no differences between those two, yet unhooking is much easier and safer to the fish. Easier tissue penetration ensures higher number of hooked up fishes - we definitely suggest to make an acquaintance with this model.

Landing nets are part of the basic equipment of every fisherman. The final fishing result depends on their reliability. Konger experts have prepared a dozen or so models of professional and failure-free landing nets intended for various fishing methods. We offer competitive, carp, fly and universal landing nets. In case of telescopic landing nets, smooth grip length adjustment and foldable triangle basket allow using them in different conditions. The net does not absorb any unpleasant smell and allows easy washing and cleaning, whereas the net's tiny mesh prevents the tangling of fishing kits. The polygonal duralumin grip ensures very high stiffness along with low weight. We recommend our landing nets for all fishermen who want to be successful.

Monofilament landing net HEAVY PIKE

Art. no	Length (cm)	Basket dimensions (cm)	Mesh size (mm)	Number of sections
700 300 005	135	55 × 50 × 70	35	1
700 300 004	165	70 × 70 × 90	35	1

Rubber-coated landing net BENT HEAD

Art. no	Length (cm)	Basket dimensions (cm)	Mesh size (mm)	Number of sections

700 523 260	260	70 × 65	20 × 20	2

NET EXTRA landing nets

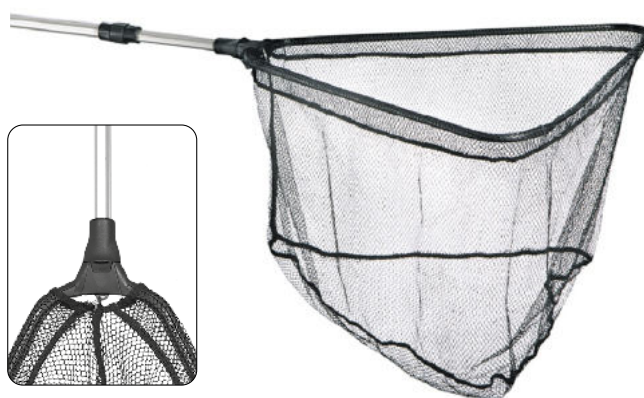

Art. no	Length (cm)	Basket dimensions (cm)	Mesh size (mm)	Number of sections
700 600 220	220	70 × 70	10 × 20	2

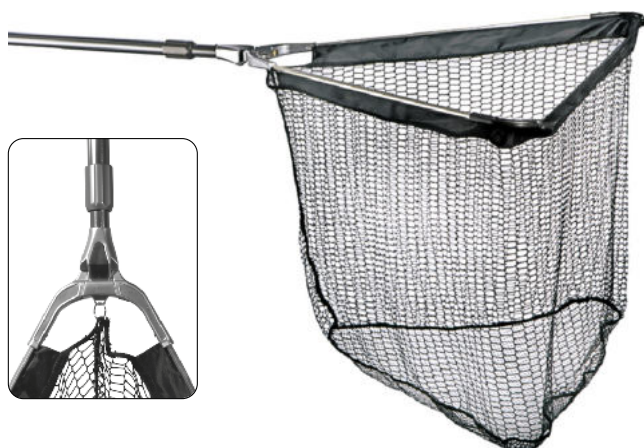

ALU SPECIAL landing net

Art. no	Length (cm)	Basket dimensions (cm)	Mesh size (mm)	Number of sections
700 700 210	210	70 × 50	10 × 20	2

ECO landing net

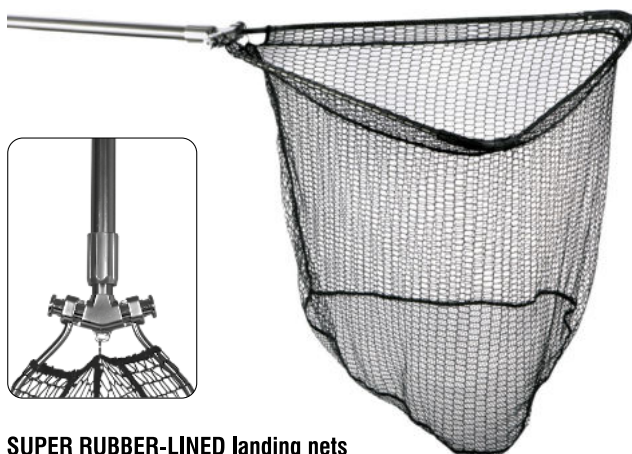

Art. no	Length (cm)	Basket dimensions (cm)	Mesh size (mm)	Number of sections
700 100 160	160	50 × 50	5 × 5	2

NANONET EXTRA landing net

Art. no	Handle length (cm)	Basket dimensions (cm)	Mesh size (mm)	Number of sections
700 601 220	220	70 × 70	6	2

The mesh of these landing nets has been made of a new material that does not absorb water or unpleasant fish smell. After use, just shake off the water and after a while the mesh will be completely dry.

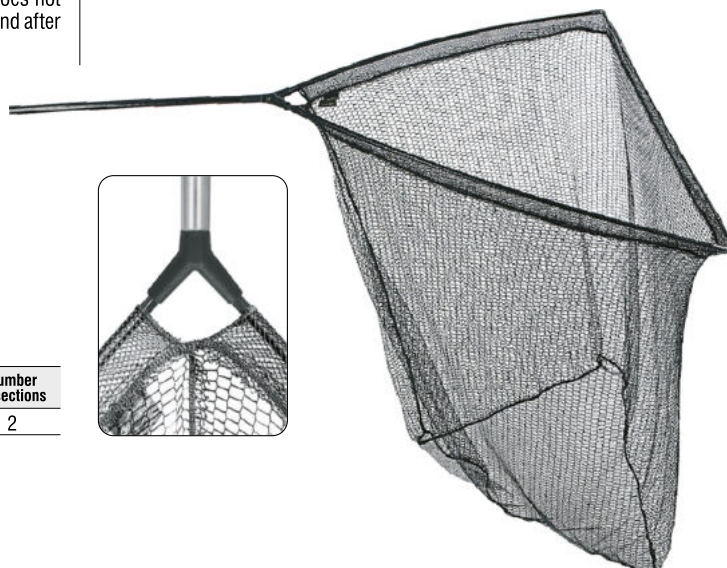

SUPER RUBBER-LINED landing nets

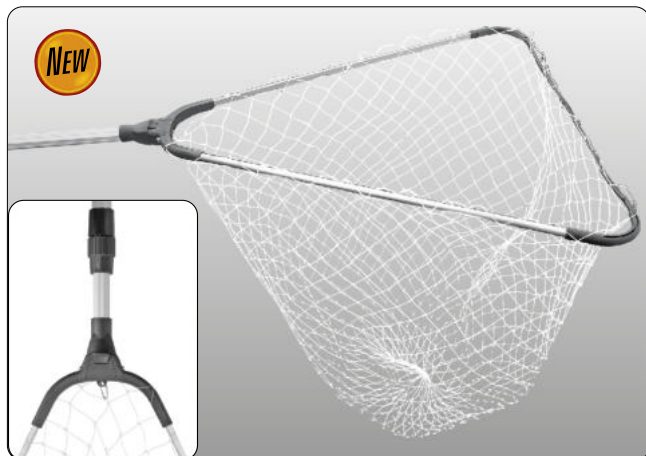

Art. no	Handle length (cm)	Basket dimensions (cm)	Mesh size (mm)	Number of sections
700 932 220	220	60 × 60	6	2
700 932 250	250	60 × 60	6	2

Professional landing nets equipped with a rubber-lined net limiting hook and treble hook tips from sticking into the net mesh, and ensuring that the net does not absorb water. The nets dry very quickly and do not absorb fish smell.

BIG CARP landing net

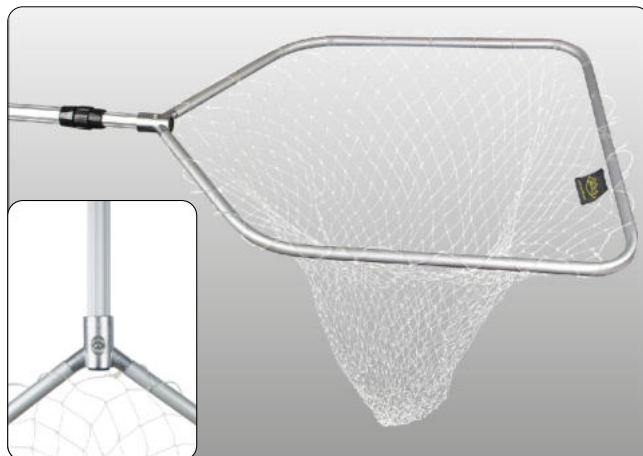

Art. no	Length (cm)	Basket dimensions (cm)	Mesh size (mm)	Number of sections
700 953 001	240	100 × 100	10 × 20	2

Monofilament landing net ECO

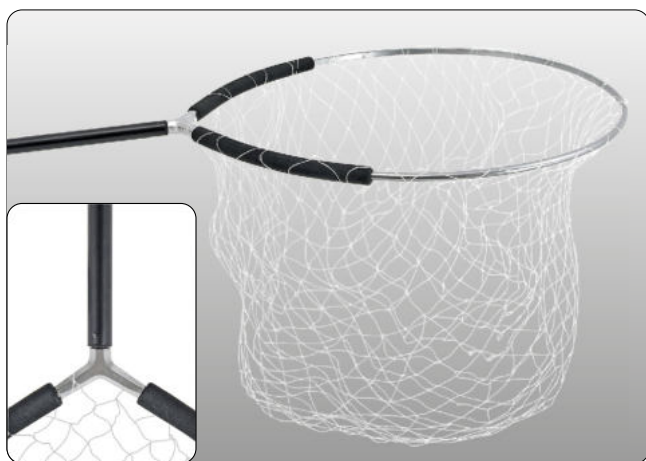

Art. no	Length (cm)	Basket dimensions (cm)	Mesh size (mm)	Number of sections
700 000 014	150	40 × 40 × 30	20	2
700 000 015	170	50 × 50 × 40	20	2
700 000 016	200	60 × 60 × 50	20	2
700 000 017	220	70 × 70 × 55	20	2

Strong monofilament landing net

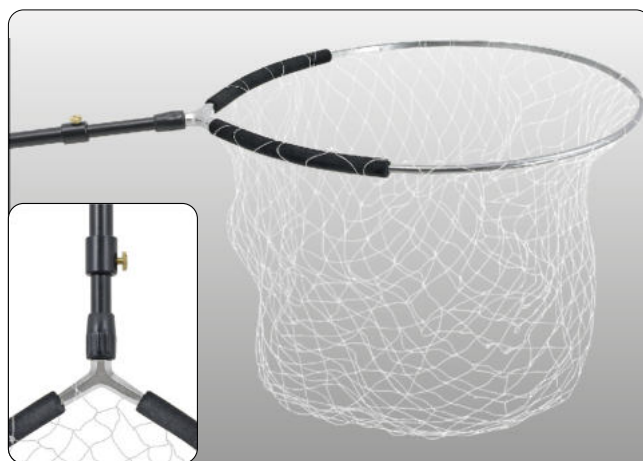

Art. no	Length (cm)	Basket dimensions (cm)	Mesh size (mm)	Number of sections
700 724 220	220	60 × 50	20 × 20	2
700 724 260	260	60 × 60	30 × 30	2

A landing net designed specifically for catching large predators and made of a transparent monofilament, so that the fish would not see it while landing, and lure hooks and treble hooks do not stick or tangle in the net while struggling with the fish.

Monofilament landing net

Art. no	Length (cm)	Basket dimensions (cm)	Mesh size (mm)	Number of sections
700 004 012	112	60 × 60	30 × 30	1

TUNGSTEN LEADERS STANDARD

From time to time, declared perch fishermen have an unexpected by catch in the form of a pike going for small lures. A perfect solution for this "tooth problem" is to equip an ultralight kit with an extremely thin 0.10 mm diameter, 2.5 kg strength tungsten leader included in our offer, available in three lengths (15, 20 and 25 cm). The leaders are equipped with strong mini snaps and reliable swivels. The leaders characterized by 5, 10, 15, 25 and 35 kg strength intended for catching medium- and largesize predators are fitted with strong top quality swivels and exceptionally durable uniform wire snaps.

Leader tungsten strength: 3 kg

Art. no	Strength (kg)	Length (cm)	Pieces per packaging
267 015 003	3	15	20 × 2
267 020 003	3	20	20 × 2

EXTRA aluminium pliers

Art. no 960 000 173
light and strong pliers recommended
for small and medium split rings

Multi-purpose pliers.

Their compact design allows:

- Convenient mounting and removing split rings.
- Wobbler adjustment.
- Safe hook removal from fish mouth.
- Shot and still weight kneading and opening.
- Fast braid cutting.
- Cutting of the steel and fluorocarbon line used for selfreliant leader assembly.

Shelter XXL tent

Art. no 976 010 007

- Dimensions: length: 390 cm, width: 295 cm, height: 150 cm
- Tent weight: 15 kg

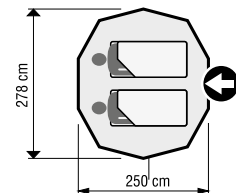

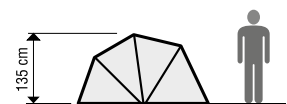

- Material resistant to 5000 mm water column
- Load bearing frame: 4 aluminium bars \varnothing 19 mm
- Possibility to detach the front and obtain a two-person tent with a canopy
- Strong, detachable and waterproof floor
- Durable and strongly sewn peg loops
- Solid, screw pegs provided in the kit
- Second skin overwrap can be purchased separately.

Tent with overwrap No 1

Art. no 976 010 001

- Dimensions: length: 250 cm, width: 278 cm, height: 135 cm
- Tent weight: 6.5 kg, spreads: 1.7 kg.

- Material resistant to 3000 mm water column, sewn mosquito screen, perfect for warm months
- Load bearing frame: 4 glass fibre bars \varnothing 11 mm
- Attachable, strong, waterproof floor
- Durable and strongly sewn peg loops
- "Second skin" overwrap provided in the kit, water resistance up to 3000 mm water column
- Eliminated water condensation effect inside the tent
- Solid, screw pegs provided in the kit.

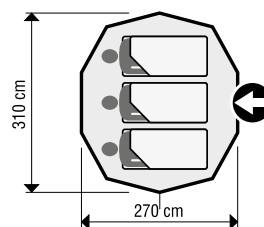

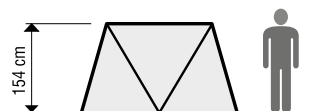

Tent with overwrap No 2 Art. no 976 010 002

- Dimensions: length: 270 cm, width: 310 cm, height: 154 cm
- Tent weight: 8.2 kg, spread weight: 1.9 kg.

8,2 kg
1,9 kg

5000 mm

- Material resistant to 5000 mm water column, can be used for winter fishing
- Load bearing frame: 2 aluminium bars \varnothing 16 mm
- Strong, detachable and waterproof floor
- "Second skin" overwrap provided in the kit, water resistance up to 5000 mm water column
- Durable and strongly sewn peg loops
- After use of the "second skin" overwrap, eliminated water condensation effect inside the tent
- Solid, screw pegs provided in the kit.

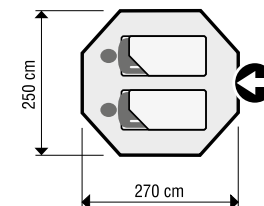

Tent No 3 Art. no 976 010 003

- Dimensions: length: 270 cm, width: 250 cm, height: 138 cm
- Tent weight: 8.2 kg.

8,2 kg

3000 mm

- Material resistant to 3000 mm water column, can be used for winter fishing
- Load bearing frame: umbrella, two 120 cm height adjusting arms, glass fibre \varnothing 11 mm entry frame
- Detachable front with mosquito screen
- Durable, detachable and waterproof polyethylene floor
- Durable and strongly sewn peg loops.

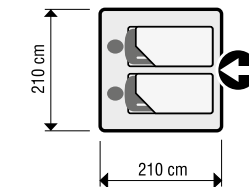

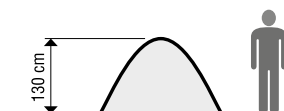

Tent No 4 Art. no 976 010 004

- Dimensions: length: 210 cm, width: 210 cm, height: 130 cm
- Tent weight: 3.2 kg.

3,2 kg

2000 mm

- Tent sheathing resistant to 2000 mm water column, sewn mosquito screen, perfect for warm months
- Load bearing frame: 2 glass fibre bars \varnothing 8.5 mm
- Fixed, strong, waterproof floor
- Durable and strongly sewn peg loops
- Eliminated water condensation effect inside the tent
- Pegs provided in the kit.

A full range of 30-85 cm ice fishing rods made of glass fibre (thanks to this material, they are characterized by high resistance to impacts and low temperature), equipped with ultra-light guides and handy foam grip. We assure you that all rods have been designed so that the fish could be hauled with a blank, not with a mono-filament using your hands (as an be often seen).

Auxiliary kit with whistle
Art. no 960 000 033

A tool kit for ice fishermen who care about their fate. This auxiliary kit includes a pair of spikes for ice walking and a whistle. More than once, it can be the last resort in case of ice break-up. These are the basic tools that facilitate getting out into the ice sheet and alarming local people about the accident.
